### **A HISTORICAL AERIAL PHOTOGRAPHS**

**B** ECOLOG ERIS REPORT

# 1 EXECUTIVE SUMMARY

---

WSP Canada Inc. (WSP) was retained by The Regional Municipality of York (hereafter referred to as “the Region”) to conduct a Contamination Overview Study (COS) as a component of the Class Environmental Assessment (EA) Study for Improvements to Langstaff Road from Weston Road to Highway 7 in the City of Vaughan, Ontario. Following project award, a portion of Highway 400 spanning from Langstaff Road north towards Rutherford Road was added to the EA and included in the evaluation of this COS. The portions of Langstaff Road and Highway 400 included in this EA are hereafter collectively referred to as “the corridor”. A 250 metre buffer zone was added to either side of the centre line of Langstaff Road and a 400 metre buffer was added to either side of Highway 400 (referred to as the “Study Area”) to account for migration of contaminants from properties/areas adjacent to the Right-of-Way (ROW). The extended buffer surrounding Highway 400 was to account for potential new Highway 400 freeway access ramps (in accordance with the Region’s 2009 Transportation Master Plan). The location and extents of the corridor and associated Study Area are shown on **Figure 1**.

The principal objective of this COS was to identify and review properties/areas whereby the current or historical operations within the Study Area may have contributed to soil and groundwater impacts along the corridor. The objective of the COS was achieved through the completion of a comprehensive records review, Study Area inspection and the documentation of the results in a COS report.

Based on the findings of this report, eighty-nine (89) Areas of Potential Environmental Concern (APECs) have been identified within the Study Area. The APECs correspond to locations within the Study Area where potential environmental impacts may be present and have been categorized (low, moderate and high) by assessing the overall relative potential of environmental impacts to be present within the subsurface.

Of the 89 APECs, 73 APECs identified were categorized as high. These locations include the following land uses: gas stations (active and historical), automotive centers, dry cleaners, industrial plazas, rail yards and rail lines, transport depots, historic cemeteries, and construction sites.

## Recommendations:

- **Property Acquisitions Environmental Due Diligence:** For the purposes of undertaking the Langstaff Road improvements, if property acquisitions are required within APECs with high potential for contamination, it is recommended that property

specific Phase One ESAs (and if necessary Phase Two ESAs) be completed in such areas in support of the property acquisitions.

- **Road Construction and Management of Surplus/Excess Soil:** With respect to road construction activities and management of surplus/excess soil, WSP recommends that a soil contaminant investigation, where excavation is proposed, be carried out by a qualified environmental consultant to assess soil quality in support of surplus/excess soil management in areas within or in close proximity to APECs with high potential for contamination. This recommendation should be reviewed and refined during Detail Design

Of the 89 APECs, 16 APECs identified were categorized as moderate. These areas represent land uses that are commercial/light industrial properties, suspected of using chemical compounds or performing activities that may impact soil and/or groundwater within the Study Area, according to Ontario Regulation 153/04, as amended.

#### Recommendations:

- **Property Acquisitions Environmental Due Diligence:** For the purposes of undertaking the Langstaff Road improvements, if property acquisitions are required within APECs with moderate potential for contamination, it is recommended that property specific Phase One ESAs (and if necessary Phase Two ESAs) be completed in such areas in support of the property acquisitions.
- **Road Construction and Management of Surplus/Excess Soil:** With respect to road construction activities and management of surplus/excess soil, WSP recommends that a soil contaminant investigation, where excavation is proposed, be carried out by a qualified environmental consultant to assess soil quality in support of surplus/excess soil management in areas within or in close proximity to APECs with moderate potential for contamination. This recommendation should be reviewed and refined during Detail Design.

All other areas not included as APECs indicate land use features considered to have a low potential for environmental impacts. The areas are generally classified as natural areas, open space or residential land use, which are not suspected of using chemical compounds harmful to the environment or human health.

#### Recommendations:

- No additional environmental investigations are recommended for APECs with a low potential for contamination.

## O.Reg.406/19 Implications

Note to the reader: In 2021, WSP was asked to provide a recommendation with regards to how the newly introduced Ontario Regulation (O.Reg.) 406/19: On-Site and Excess Soil Management may impact this project. Because this is an infrastructure project, it may be exempt from certain requirements of O.Reg.406/19, however the following should be noted:

- The background documents ordered as part of this COS report may need to be updated to determine if there are land use changes to the Site and surrounding Study Area that could impact the quality of the excess encountered during construction.
- As well, prior to the removal of soil from the Project Area, some form of site/soil characterization will be required to facilitate the off-site management as described in the Soil Rules under O.Reg.406/19. As such, the soil contaminant investigation recommendation in the areas of high and moderate APECs still applies.

## 2 INTRODUCTION

---

### 2.1 BACKGROUND

WSP Canada Inc. (WSP) was retained by The Regional Municipality of York (the Region) to conduct a Contamination Overview Study (COS) as a component of the Class Environmental Assessment Study for Improvements to Langstaff Road from Weston Road to Highway 7 in the City of Vaughan, Ontario. Following project award, the portion of Highway 400 from Langstaff Road extending north to Rutherford Road was added to the EA and evaluated as part of this COS. The collective portions of Langstaff Road and Highway 400 included in the EA are hereafter referred to as “the corridor”. For the purposes of this study, a 250 metre buffer zone was added to either side of the centre line of Langstaff Road and a 400 metre buffer was added to either side of Highway 400 (referred to as the “Study Area”) to account for migration of contaminants from properties/areas adjacent to the Right-of-Way (ROW) as seen in **Figure 1**. The extended buffer surrounding Highway 400 was to account for potential new Highway 400 freeway access ramps (in accordance with the Region’s 2009 Transportation Master Plan).

It should be noted that this COS is intended as a broad level assessment of actual and potential sources of site contamination within a given area and is based solely on the known current and former land uses/activities within and surrounding the corridor. This study is not a full environmental liability assessment of each property potentially impacted by the undertaking, and it does not constitute a Phase One Environmental Site Assessment (ESA) as defined by the Canadian Standards Association (CSA Z768-01), and Ontario Regulation 153/04, as amended.

---

### 2.2 PROJECT OBJECTIVE

The principal objective of this COS was to identify and review properties/areas with actual or potential sources of contamination that may impact future road improvements; and to identify appropriate future environmental studies and mitigation measurements required to be implemented during the design and construction phases of this project.

For the purposes of this study, contamination is defined as a material or condition present in the soil, groundwater, or surface water, which may have an adverse effect on human health or the natural environment (e.g., soil, water, and land).

---

## 2.3 SCOPE OF WORK

The scope of work undertaken for this COS included the following tasks:

### RECORDS REVIEW

- Review of Physiographic, Geological and Hydrogeological Maps and reports – to identify the general physiography, geology, and hydrogeology within and surrounding the Study Area in an effort to understand the fate of any actual or potential site contamination;
- Review of Existing Reports and Historical Records – to review any relevant environmental information previously collected for the Study Area and surrounding properties;
- Review of Aerial Photographs – to identify areas of potential environmental concern within and adjacent to the Study Area;
- Review of Private Source Data through an EcoLog Environmental Risk Information Services (ERIS) Report to provide relevant information on private and retail fuel storage tanks, automotive wrecking and supply facilities, waste disposal sites (including Certificates of Approval), and Ontario Regulation 347 registered waste generators; and
- Review of Municipal and Regional Data – to identify any potentially contaminated sites located within the Study Area.

### STUDY AREA RECONNAISSANCE

- Completion of a Study Area reconnaissance to broadly identify properties/areas that pose a potential for site contamination, either based on the nature of their operations/land use (eg., service stations, industrial areas) or by visual evidence of contamination (eg. piles of waste and fill, surface staining). This inspection was limited to non-intrusive roadside inspection.

### REPORTING

- Compilation, evaluation and discussion of key findings through a thorough review of all information gathered pertaining to the Study Area and undertaking; concluding remarks on the presence/probability of actual or potential contamination within the Study Area; recommendations for any follow-up work; and written documentation of the results into this COS report.

## 3 STUDY AREA DESCRIPTION AND SETTING

---

### 3.1 DESCRIPTION OF THE STUDY AREA

The corridor includes a seven kilometre stretch of Langstaff Road from Weston Road extending east to Highway 7, and a 2.3 kilometre stretch of Highway 400 from Langstaff Road extending north to Rutherford Road. The Study Area includes a 250 metre buffer on either side of the ROW limit along Langstaff Road to account for migration of contaminants from properties/areas adjacent to the corridor. It should be noted that the portion of the corridor along Highway 400 included a 400 metre buffer on either side of the highway to account for migration of contaminants from properties/areas adjacent to the corridor and for the additional purpose of incorporating the land requirements for potential new Highway 400 freeway access ramps (included in the Region's 2009 Transportation Master Plan). **Figure 1** shows the limits of the Study Area.

---

### 3.2 CURRENT SURROUNDING LAND USE

Land use within the Study Area is primarily composed of commercial, residential and industrial with light institutional and parkland. Natural heritage features are limited to three watercourses and their associated semi-natural wooded corridors: Black Creek in the west portion of the Study Area, crossing Langstaff Road at Highway 400; the Don River (West Branch), crossing Langstaff Road on the east side of Keele Street; and Westminster Creek, crossing Langstaff Road on the west side of Dufferin Street.

Four parks are within the east portion of the Study Area: Langstaff Park (with the Don River running through it), LeParc Park, West Crossroads Park and Crossroads Park. There is also a large, unnamed forested area on the north east corner of Dufferin Street and Langstaff Road with a large pond that feeds Westminster Creek.

The Canadian National MacMillan Marshalling Yard is located in the central portion of the Study Area, dividing Langstaff Road (Langstaff Road ends at the west side of the yard and continues again on the east side of the yard).

---

### 3.3 TOPOGRAPHY AND DRAINAGE

The Study Area lies within the Don River Watershed. According to the National Resources Canada website, the ground surface elevations within the Study Area range from 200 meters above sea level (masl) to 216 masl in the north portion, sloping gently south 190 – 210 masl.

Storm water run-off within the Study Area is conveyed from urban and rural (natural) areas into municipal storm sewers.

---

### 3.4 PHYSIOGRAPHY

According to Chapman and Putnam's "The Physiography of Southern Ontario, Third Edition" (1984; 2007), the Study Area is located within the physiographic region known as the Peel Plain.

The Peel Plain is a region of flatter topography, characterized by a thin layer of silt and clay lacustrine deposits up to 5m thick, overlying glacial till. The soils are predominantly clay with localized clay loam and loam. The general elevation is 150 to 230 masl and there is a gradual, uniform slope toward Lake Ontario (Chapman and Putnam, 1984; 2007).

---

### 3.5 GEOLOGY

#### 3.5.1 SURFICIAL GEOLOGY

According to the "Surficial Geology of Southern Ontario" (OGS, 2010), the Study Area consists of fine textured glaciolacustrine deposits in the west, clay to silt till in the majority of the middle portion, modern alluvial deposits in the vicinity of the Don River, and sandy silt till in the south east.

---

#### 3.5.2 BEDROCK GEOLOGY

According to the "Bedrock Geology of Ontario" (OGS, 2011), and the Aggregate Resources Inventory of the Regional Municipality of York (Rowell & Gao, 2010), the Study Area is underlain by bedrock of the Ordovician Georgian Bay formation.

The Georgian Bay formation trends in a northwest direction from Lake Ontario toward Georgian Bay and is composed of green-blue shale interbedded with limestone, siltstone and sandstone. The Georgian Bay formation is mapped as being 125 m to 200 m in thickness (Rowell & Gao, 2010).

---

## 3.6 HYDROGEOLOGY

---

### 3.6.1 *OVERBURDEN AQUIFER*

As described in **Sections 3.4 and 3.5**, the Study Area has a variety of surficial soil deposits, including sand, silt, clay and glacial till deposits. The Oak Ridges Moraine, which lies approximately 1.5 m north of the Study Area, acts as a source of baseflow for the Don River. Sand and gravel deposits of glaciofluvial and glaciolacustrine origins are the main aquifers within the Study Area.

The Thornhill Aquifer is a confined aquifer that is located in the central part of the Don River watershed, which is also included in the Study Area. This aquifer is covered with Halton Till and some glaciolacustrine clay, consisting of mainly sand and gravel deposits that range in thickness from a few metres up to 40 m (Singer et. al, 2003).

---

### 3.6.2 *BEDROCK AQUIFER*

The bedrock aquifer is the deepest aquifer system within the Study Area. The bedrock aquifer within the Study Area is known as the Georgian Bay Formation.

As mentioned in Section 3.5.2, The Georgian Bay Formation is of Ordovician age and consists of shale interbedded with limestone, siltstone and sandstone. According to Singer et al. (1994), there are only a few wells within this formation, and is described as a poor aquifer with low water-yielding capability.

## 4 RECORDS REVIEW

---

### 4.1 EXISTING REPORTS

- i) Unterman McPhail Associates. 2017. *Existing Conditions Report Cultural Heritage Landscapes & Built Heritage Resources. Municipal Class Environmental Assessment Study Improvements to Langstaff Road from Weston Road to Highway 7*. City of Vaughan. Regional Municipality of York. Prepared for WSP|MMM Group.

A summary of the report is included below:

- The purpose of the Built Heritage report was to provide preliminary information regarding the cultural heritage landscapes and built heritage resources located within the Study Area. The report includes a historical summary on the Vaughan Township/City of Vaughan, descriptions of the Study Area, and survey results from public consultation and Cultural Heritage resources.
  - Historically Langstaff Road was laid out as an east-west sideline road between Lots 10 and 11 in the original township survey in the early 1800s and remained rural until the mid to late twentieth century, where it transformed into the industrial and urban area it is present day.
  - The CNR MacMillan Yard was developed between Keele Street and Jane Street in the late 1950s. As this area of Vaughan was largely rural, the construction of the CNR yard resulted in a discontinuous section of Langstaff Road.
  - One property, 1300 Langstaff Road (the former Isaac Baker Property), is included in the City's Listing of Buildings of Architectural and Historical Value in accordance with Part IV, Subsection 27 of the Ontario Heritage Act (OHA). There is also one historical plaque commemorating the Langstaff Cemetery at 2077 Langstaff Road.
- ii) Transportation Safety Board of Canada. February 2010. *Railway Investigation Report: Non-Maintrack Train Derailment; Canadian National Railway Yard Switching Movement Mile 0.0, Halton Subdivision MacMillan Yard, Toronto (Ontario)*.

A summary of the report is included below.

- The purpose of this report was for the investigation by the Transportation Safety Board of Canada (TSB) for a tank car derailment at the MacMillan Yard. The report includes details of the location, accident, site examination and remediation details, as well as train cart failure analysis.

- The accident resulted in 57,000 litres of ferric sulfate, categorized as a dangerous good and corrosive liquid, to be released to the soil and surrounding area. The contaminated area is on the north east side of the railyard, along Roadway R9 of the Receiving Yard.
- The remediation efforts were extensive and involved air quality monitoring, soil removal, and liquid extraction. 30,000 litres of ferric sulphate solution was recovered along with 3200 tons of contaminated ballast, ties and soil removed from an area measuring 150 metres long and 50 meters wide.
- Surface water and catch basin monitoring was conducted and eleven monitoring wells were installed to monitor potential migration of any residual material. Site monitoring determined the site remediation had been successful, and has since then been discontinued.
- This spill is also identified within the ERIS report (**Appendix B**).

## 4.2 AERIAL PHOTOGRAPHS

Aerial photographs obtained from The Regional Municipality of York online interactive mapping website were reviewed for the years 1954, 1970, 1978, 1988, 1995, 2002, 2007, 2011, and 2016 (**Appendix A**). Significant observations noted within the Study Area are included in **Table 1** below.

**Table 1 - Summary of Aerial Photography**

Aerial Year	Observations
1954	Highway 400 is visible running north to south, portions of Langstaff Road are also visible (the portion of Langstaff between Jane Street and Weston Road are not shown). The CNR MacMillan Yard had not been built yet. The entire Study Area appears to be mainly farmland/agricultural plots.
1970	The CNR MacMillan Yard is now built in the central portion of the Study Area. The land type is still mostly agricultural, but on the east side of the CNR MacMillan Yard a few industrial type buildings have been built.
1978	Area east of the CNR continues to develop.
1988	Residential complexes have been built west of Highway 400, and a few industrial buildings have been constructed west of the

Aerial Year	Observations
	CNR MacMillan Yard. Increased amount of industrial buildings have been constructed on Langstaff Road east of the CNR MacMillan Yard, with the exception of the farthest east corner of the Study Area remaining vacant/empty lots. Along Highway 400, the land remains farmland/vacant, and the Rutherford Road interchange has been constructed.
1995	Industrial development continues along Langstaff Road between Highway 400 and the CNR MacMillan Yard. The surrounding area of the CNR MacMillan Yard (with exception of the north west quadrant) has been developed with buildings.
2002	Langstaff Road is fully developed with both residential and commercial/industrial buildings, and is trending north along Highway 400. The entire surrounding area of the CNR MacMillan Yard is also developed. The east end of the Study Area between Dufferin Street and Highway 7 has a few residential complexes, and a large stormwater management pond.
2007	The east side of Highway 400 continues to develop, including the addition of the large Vaughan Mills mall. Increased development on the west side of Highway 400 is present also, close to Langstaff Road. Further residential development has occurred on the far east section of the Study Area.
2011	Same as above, no major changes. Study Area fully developed.
2016	Same as above, no major changes. Study Area fully developed.

---

### 4.3 HISTORICAL MAPS

Fire Insurance Plans (FIPs) were not requested due to the size of the Study Area.

---

#### 4.4 MUNICIPAL RECORDS

WSP contacted York Region in September 2017, requesting a search of their general records for any relevant environmental information pertaining to the Study Area, including records of environmental complaints, spills, notifications, and building permits. These documents may provide site plan development information which may include facilities, buildings and/or structures of potential environmental significance (e.g., fuel storage and dispensing areas, waste oil tanks and oil/water separators, and waste management areas), active or closed waste disposal sites or historical activities, and any spill and environmental compliance notifications/complaints. The purpose of the review was to obtain information on properties, located within the Study Area, which have the potential for site contamination.

At the time of the report preparation, WSP had not received a response from the Region. Upon receipt of the information, WSP will evaluate the findings and provide any relevant information as an addendum to this report.

---

#### 4.5 ERIS ENVIRONMENTAL AND HISTORICAL INFORMATION

The Ecolog ERIS (ERIS) system provides information from federal, provincial and private source databases relating to a defined search area. Each database is divided into records that present information such as company names, addresses, descriptions, status and other pertinent information. Records that fall within a defined kilometer radius of the search area are extracted from the database for review. Records that are not able to be plotted due to incomplete or inaccurate location information are listed in the Unplottable Summary – these records may or may not be within the Study Area. A detailed description of ERIS databases is provided in **Appendix B**.

One standard ERIS report was prepared for the Study Area. The search results of ERIS databases identified 3,532 records with known locations within the Study Area. 271 records were listed in the Unplottable Summary, however after review, none of the records included in the Unplottable Summary apply to the Study Area. These records are summarized in **Table 1** below.

**Table 2 - Summary of Environmental Information Presented in ERIS Database**

ERIS DATABASE SEARCHED	RESULTS	SIGNIFICANCE OF FINDINGS
List of TSSA Expired Facilities	One hundred and thirty-nine (139) records were found within the Study Area.	High
Fuel Storage Tank	Twenty (20) records were found within the Study Area. Two (2) records were listed for 2777 Langstaff Road; four (4) records were listed for 8555 Keele Street; four (4) records were listed for 15 Connie Crescent; four (4) records were listed for 681 Chrislea Road; one (1) record was listed for 62 Administration Drive; and five (5) records were listed for 3680 Langstaff Road.	High
Fuel Storage Tank - Historical	Fourteen (14) records were found within the Study Area. Two (2) records were found at 2777 Langstaff Road; one (1) record was found at 8400 Jane Street; two (2) records were found at 8555 Keele Street; one (1) record was found at 15 Connie Crescent; two (2) records were found at 681 Chrislea Road; two (2) records were listed for the CNR MacMillan Yard; and two (2) records were found at 3680 Langstaff Road.	High
TSSA Incidents	Nine (9) records were found within the Study Area. One (1) record was found at 665 Millway Avenue #6; one (1) record was found at 4A 10 Planchet Road; One (1) record was found at 65 Basaltic Road; One (1) record was found for 85 Basaltic Road; One (1) record was found for 94 Sherwood Park Drive; One (1) record was found for 61 Administration Road; One (1) record was found for 1 Jarrett Court; One (1) record was found for 38 Pikake Court; and one (1) record was found for 219 Dante Court.	High

ERIS DATABASE SEARCHED	RESULTS	SIGNIFICANCE OF FINDINGS
TSSA Historic Incidents	Four (4) records were found within the Study Area. One (1) record was found at 8400 Jane Street; one (1) record was found at 1201 Creditstone Road; one (1) record was found at 20 North Rivermede Road; and one (1) record was found at 1681 Langstaff Road.	High
TSSA Pipeline Incidents	Two (2) records were found within the Study Area. One (1) record was found for at 300 Applewood Road and one (1) record was found for 124 Connie Crescent.	High
Waste Disposal Sites	Thirteen (13) records were found within the Study Area. Eight (8) records were found for the Canadian National Railway; three (3) records were found for the Regional Municipality of York located at 130 McClearly Court, Vaughan; and one (1) record was found for Franklin Industrial Services Inc. located at 750 Bowes Road, Vaughan.	High
Automobile Wrecking & Supplies	Four (4) records were found within the Study Area. Two (2) records were for Universal Recycling located at 36 Basaltic Rd, Concord, Ontario, and two (2) records were found for Vista Automotive located at 55 Administration Road, Concord, Ontario.	High
Private and Retail Fuel Storage Tanks	Twenty-three (23) records were found within the Study Area.	High
O. Regulation 347 Waste Receivers Summary	Twenty-one (21) records were found within the Study Area.	High
O. Regulation 347 Waste	One thousand, four hundred and forty-two (1442) records were found within the Study Area.	High to Moderate

ERIS DATABASE SEARCHED	RESULTS	SIGNIFICANCE OF FINDINGS
Generators Summary		
Commercial Fuel Oil Tanks	One (1) record was found within the Study Area for John Sousa Maintenance Ltd located at 2777 Langstaff Rd, Woodbridge, Ontario	High
Retail Fuel Storage Tanks	Eight (8) records were found within the Study Area. One (1) record was found for Sunstar Service Center Inc. located at 8400 Jane Street; one (1) record was found for Dynamic Auto Service located at 8540 Keele Street; one (1) record was found for Superior Propane located at 8470 Keele Street; three (3) records were found for Mr. Lube located at 8555 Keele Street; one record was found for Canadian Rental Centres located at 8672 Keele Street; and one (1) record was found for RS Bulk Propane Inc. located at 147 Citation Drive.	High
Ontario Oil and Gas Wells	One record was found within the Study Area for Langvalely Holdings Inc., Vaughan, ON.	High
Ontario Spills	Three hundred and six (306) records were found within the Study Area.	High to Moderate
Anderson's Waste Disposal Sites	Two (2) records were found within the Study Area for the West Road Junkyard in Woodbridge, ON.	High
Chemical Register	Three (3) records were found within the Study Area. Two (2) records were found for Kobitex Inc. located at 55 Administration Road, Thornhill, ON, and one (1) record was found for Chemsyn Chemical Corp. located at 23 McCleary Court, Concord, ON.	Moderate
Environmental Activity and Sector Registry	Fifteen (15) records were found within the Study Area. One (1) record was found for 2821 Langstaff Road; One (1) record was found for 53 Courtland Avenue; Two (2) records were found	Moderate

ERIS DATABASE SEARCHED	RESULTS	SIGNIFICANCE OF FINDINGS
	for 8540 Keele Street; One (1) record was found for 731 Millway Avenue; One (1) record was found for 3333 Langstaff Road; Two (2) records were found for 336 Courtland Avenue; One (1) record was found for 300 Applewood Crescent; Three (3) records were found for 199 Four Valley Drive; One (1) record was found for 221 Creditview Road; One (1) record was found for 700 Chrislea Road; and one (1) record was found for 20 Rivermede Road North.	
Environmental Registry	Ninety-two (92) records were found within the Study Area.	Moderate
Record of Site Condition	Five (5) records were found within the Study Area. One (1) record was found for Vitran Express Canada Inc., two (2) records were found for Jeld-Wen of Canada Ltd. located at 8550 Keele St and 8383 Weston Road; and two (2) records were found for R.A. Branca Investments Limited located at 129 Fernstaff Court, Vaughan.	Moderate
Scott's Manufacturing Directory	Five hundred and seventy-three (573) records were found within the Study Area.	Moderate
Compliance and Convictions	One (1) record was found within the Study Area for Bulk Plus Logistics Ltd. located at 8820 Keele Street, Vaughan, ON.	Low
Pesticide Register	Fifteen (15) records were found within the Study Area. Five (5) records were found for 8540 Keele Street; Three (3) records were found for 15 Connie Crescent; One (1) record was found for 8955 Weston Road; Two (2) records were found for 8401 Weston Road; One (1) record was found for 147 Bourbon Street; one (1) record was found for 46 Ledge Rock Drive; and	Low

	two (2) records were found for 140 Fernstaff Court.	
Environmental Compliance Approval	One hundred and fifty-eight (158) records were found within the Study Area.	Low
Certificates of Approval	One hundred and sixty-six (166) records were found within the Study Area.	Low
National PCB Inventory	Fifteen (15) records were found within the Study Area. One (1) record was found for 8500 Keele Street; Three (3) records were found for 8300 Keele Street; Four (4) records were found for 8200 Keele Street; Four (4) records were found for 7900 Keele Street; and two (2) records were found for 69 Connie Crescent.	Low
Inventory of PCB Storage Sites	Five (5) records were found within the Study Area. One (1) record was found for 8200 Keele Street; Two (2) records were found for 7900 Keele street; and two (2) records were found for 69 Connie Crescent.	Low
National Pollutant Release Inventory	Two hundred and ten (210) records were found within the Study Area.	Low
ERIS Historical Searches	One hundred and ninety (190) records were found within the Study Area.	Low
Permit to Take Water	Two (2) records were found within the Study Area for 7880 Keele Street.	Low
Borehole	Seventy-three (73) records were found within the Study Area.	Low

The ERIS records indicate that there is extensive industrial and commercial land uses in the Study Area including private and retail fuel dispensers, manufacturers, waste disposal sites and automobile wrecking facilities with the potential to impact the quality of soil and groundwater within the corridor and surrounding Study Area. **Section 5** of this report

summarizes the Areas of Potential Environmental Concern (APEC) that were identified as a result of the ERIS report and Study Area reconnaissance (discussed in **Section 4**).

---

## 4.6 MINISTRY OF THE ENVIRONMENT AND CLIMATE CHANGE INFORMATION

---

### 4.6.1 COAL GASIFICATION PLANT INVENTORY

The Coal Gasification Plant inventory includes both the “Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987” and the “Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988”, collected by the MOECC. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars.

According to the ERIS database search, there were no coal gasification plants within the Study Area.

---

### 4.6.2 BROWNFIELD ENVIRONMENTAL SITE REGISTRY

The Environmental Site Registry (ESR) is a publicly accessible database documenting any Records of Site Condition (RSC) that have been filed with MOECC since the inception of the ESR in October 2004. The RSC documents any environmental site assessment (i.e., Phase One and Phase Two ESAs), site clean-up, and / or site-specific risk-assessment completed at a particular property. This legal instrument is pursuant to Ontario Regulation 153/04 of Part XV.1 of the Ontario Environmental Protection Act. The significance of the ESR relevant to this COS is that it identifies properties that have been investigated for potentially contaminating activities that are in close proximity to the Study Area and therefore have potential for the migration of contaminants.

According to the ERIS database search, there were five (5) records for properties within the Study Area where RSCs have been filed, including one record for Vitran Express Canada Inc. located at 1201 Creditstone Road, Richmond Hill; two (2) records were found for Jeld-Wen of Canada Ltd. located at 8550 Keele St and 8383 Weston Road, Vaughan; and two (2) records were found for R.A. Branca Investments Limited located at 129 Fernstaff Court, Vaughan.

---

### 4.6.3 WASTE DISPOSAL SITE INVENTORY (1991)

MOECC maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. “Class A” sites are those that are deemed to have the

potential to impact human health because of the proximity to human development; “Class B” sites are those that are deemed to have the potential to impact the environment.

According to the ERIS database search, there are thirteen (13) records within the Study Area, including eight (8) records for the Canadian National Railway; three (3) records were found for the Regional Municipality of York located at 130 McClearly Court (Community Environmental Centre), Vaughan; and one (1) record was found for Franklin Industrial Services Inc. located at 750 Bowes Road, Vaughan.

---

#### 4.7 FEDERAL CONTAMINATED SITE INVENTORY

The Federal Contaminated Sites Inventory (FCSI) includes information on all known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

According to the ERIS database search, there were no federal contaminated sites within the Study Area.

## 5 STUDY AREA RECONNAISSANCE

---

WSP carried out a site visit of the Study Area on November 1<sup>st</sup> and 2<sup>nd</sup>, 2017. The weather was cloudy with slight rain, with a temperature around 10 °C. The purpose of the visit was to document land uses and business operations that may represent a potential source of contamination within the Study Area (e.g., gas stations, auto repair facilities, and industrial operations). The results of the Study Area reconnaissance have been incorporated into this report. It should be noted that the reconnaissance did not include any building inspections or comprehensive exterior inspections of any properties in the Study Area. Therefore, any inferences regarding the presence or absence of contaminating activities are strictly based on visual observations made from the roadside in publicly accessible areas.

Current land uses noted within the Study Area include:

- Industrial plazas with companies including metal fabrication, plastic manufacturing, and warehouses;
- Large trucking operations;
- Commercial plazas with Dry Cleaner locations;
- Gas stations and/or self-serve car washes;
- Construction lots;
- Enbridge Natural Gas pipelines;
- The Canadian National Railway including the MacMillan Yard;
- Highway 407 and Highway 400;
- Residential;
- Automotive Centres;
- Parks and the Don River West Branch; and
- A historical cemetery.

The results of the inspection showed that land uses in the Study Area consists of a mixture commercial, industrial with light institutional, parkland as well as some residential. Photographs of the observations noted during the Study Area reconnaissance are illustrated on **Figures 2 to 4**.

---

## 5.1 ACTUAL SOURCES OF CONTAMINATION

No actual sources of contamination were identified during the Study Area reconnaissance.

---

## 5.2 POTENTIAL SOURCES OF CONTAMINATION

APECs with high and moderate potential for contamination noted during Study Area reconnaissance are discussed in more detail in the following sections, and are illustrated on **Figures 2 to 4**.

It should be noted, that an activity or operation which appears below does not necessarily mean that hazardous substances are used or stored on all sites occupied by that activity or operation, nor that the land use will have any hazardous substances present.

---

### 5.2.1 COMMERCIAL AND INDUSTRIAL LAND USE

Potential soil and groundwater contamination may exist within the Study Area as a result of current and historical commercial/industrial land uses. Below is a list of operations and activities associated with commercial/industrial land uses identified within the Study Area.

#### FUEL STORAGE TANKS (PRIVATE AND RETAIL)

Automotive centres and gas stations may operate pump islands and have underground storage tanks (USTs) for storing fuel, small storage areas, and occasionally service areas for automobile maintenance. Gasoline and diesel fuel are transferred from bulk container trucks to large USTs. Spills at transfer areas and pumps, along with overfilling of and leakage from the USTs, are potential sources of contamination. During the Study Area reconnaissance, four (4) retail fuel stations were observed containing retail USTs and five (5) automotive centres were observed which have the potential to contain private and retail fuel storage tanks.

Many rural residential/commercial properties typically use USTs and aboveground storage tanks (ASTs) for heating oil storage and wastewater storage (e.g., septic tanks and tile beds). As such, potential site contamination may exist on these types of properties resulting from leaking, spilling or inappropriate handling practices related to the above activities. No residences were observed with a tank potentially used for heating oil storage during the Study Area reconnaissance.

## WATER TREATMENT PLANTS, MANUFACTURING FACILITIES, AND REGISTERED WASTE GENERATORS

A wide range of chemicals are used at facilities that manufacture and distribute parts/products for industrial and commercial use. These chemical products may include acids and bases, dyes and pigments, PCBs, polymers, plastics, surfactants, solvents, soaps, and waxes. These manufacturing processes are highly variable, depending on the product being produced. There are; however, certain types of process components that are frequently encountered in these facilities, including bulk storage for gaseous, liquid and solid materials, blending and packaging equipment, storage areas for drums, waste piles and disposal pits.

Based on the observations noted during the Study Area reconnaissance, several industrial and manufacturing facilities were observed including metal fabrication, plastic fabrication facilities and truck repair shops. The list of registered waste generators was based on the records documented in the ERIS report and observed in the field which included dry cleaners, pharmaceutical companies, UPS etc.

## EXISTING RAILWAY LINES AND YARD

Several factors associated with railways including brake dust, cargo spills, oils and lubricants, and diesel fuels can cause potential environmental concern. Soil contamination may exist within the land on or adjacent to railway tracks as railways are often developed on poor quality fill and ballast material in addition to railway ties being impregnated with creosote compounds.

The CNR MacMillan Yard is located in the central portion of the Study Area running north to south. There is an additional rail crossing in the Study Area, crossing Langstaff Road just east of Planchet Road (Metrolinx GO Barrie Line).

Due to the typical activities and operations associated with railways and the rail yard, there is potential that the soil and groundwater within the vicinity of the rail yard and rail crossing is impacted. The most likely pathway for potential contamination from these land uses is through perched/shallow groundwater; surface water runoff along drainage ditches, utility conduits (e.g. sewer and water lines); and adjacent watercourses and water bodies.

As indicated in Section 4.1, there was one reported major spill at the MacMillan Yard in February 2010. 57,000 litres of ferric sulphate was released to the ground. Remediation and surface water monitoring was successful and has since been discontinued. Furthermore, according to the ERIS report, numerous contaminant spills have been recorded for the MacMillan Yard.

---

### **5.2.2 OIL/GAS PIPELINES**

An Enbridge Natural Gas pipeline exists within the Study Area, which follows Keele Street on the west side, just north of Langstaff Road. If pipelines are not adequately maintained, leaks and/or spills may occur to the surrounding environment which could impact soil and groundwater.

---

### **5.2.3 PRIVATE WATER WELLS**

Private water wells are typically present in rural areas. Based on the information in the ERIS report in total there are eighty-four (84) water wells identified within the Study Area, of which sixty-two (62) are monitoring wells/test holes, six (6) are abandoned, five (5) are domestic/livestock, five (5) are dewatering, one (1) is for commercial use, and five (5) are unknown. The installation years on the domestic wells date back to the 1950-1960s, before the Study Area was urbanized.

No water wells were observed during the Study Area reconnaissance.

---

### **5.2.4 VEHICULAR TRAFFIC AND ROAD DEBRIS**

The cumulative effects of many years of moderate road traffic within the Study Area may have resulted in potential soil contamination. This contamination typically results from vehicle exhaust (e.g., lead and other metals), general wear and tear (e.g., heavy metals, oils and lubricants), and winter road maintenance activities (e.g., salting), and is most prevalent on the road shoulders and roadside drainage ditches in areas of high traffic volume.

Highway 400 and Langstaff Road are extensively travelled roadways and as such there is the potential for residual salt impacts, metals and petroleum hydrocarbons (PHCs) to be present in the shallow soil and groundwater resulting from winter road salting operations along the road ROW, vehicular exhausts, transportation accidents and spills. No evidence of spills were observed on any of the roadways within the Study Area; however, the historical spills may have impacted the quality of soil and groundwater within the Study Area.

---

### **5.2.5 HYDRO CORRIDORS**

Historical spraying of vegetation with pesticides may have occurred within hydro corridors resulting in chemical accumulation in the shallow soil. In addition, corrosion of the galvanized steel towers which support the electrical transmission lines can cause

elevated concentrations of zinc of the soil. During the Study Area reconnaissance, there was no evidence of a hydro corridor within the Study Area.

## 6 AREAS OF POTENTIAL CONCERN

### 6.1 APECS WITH HIGH POTENTIAL FOR CONTAMINATION

Based on the findings of this report, APECs have been identified within the Study Area and shown on **Figures 2 to 4**. The land use categories (left column of **Table 3**) include abbreviations in brackets; these abbreviations are used to depict the locations of the APECs on **Figures 2 to 4**. The APECs correspond to the locations in the Study Area, where potential contamination may be present and have been categorized (low, moderate and high) by assessing the overall relative potential of contamination from the findings in **Sections 2.0** through **4.0** of this report.

**Table 3 - APECs with High Potential for Contamination in Study Area**

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY NUMBER (AS PER ONTARIO REGULATION 153/04) <sup>1</sup>
Gas Stations (GS)	GS1 – Petro Canada, 3680 Langstaff Road GS2 – Husky Gas, 681 Chrislea Road GS3 – AMCO Petroleum, 15 Connie Crescent GS4 – Esso, 8555 Keele Street	28 – Gasoline and associated products storage in fixed tanks
Automotive Centers (AC)	AC1 – Truck Repair, 100 Fernstaff Court AC2 – Staffern Automotive, 20 Staffern Drive AC3 – Mr. Lube, 8555 Keele Street	10 – Commercial auto body shops 28 – Gasoline and associated products storage in fixed tanks

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY NUMBER (AS PER ONTARIO REGULATION 153/04) <sup>1</sup>
	AC4 – AAMCO Repair Services, 8600 Keele Street  AC5 – BAIO Auto Service, 989 Creditstone	
Railway Line (RL)	RL1 – Barrie Go Line, east of Planchet Road, Vaughan, ON.	46 – Rail yards, tracks and spurs
Railway Yard (RY)	RY1 – Canadian National MacMillan Yard, between Creditstone Road and Keele Street, Vaughan, ON.	27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles, and Aviation Vehicles  46 – Rail yards, tracks and spurs  52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
Dry Cleaners (DC)	DC1 – Young’s Cleaners, 8401 Weston Road  DC2 – High Class Cleaners, 1641 Langstaff Road	37 – Operation of dry cleaning equipment (where chemicals are used)

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY NUMBER (AS PER ONTARIO REGULATION 153/04) <sup>1</sup>
	DC3 – Langstaff Cleaners, 3650 Langstaff Road	
Transport Depot (T)	T1 – 8470 Keele Street T2 – RLT, 175 Courtland Avenue T3 – Sure Trucking, 321 Courtland Avenue	11 – Commercial Trucking and Container Terminals  28 – Gasoline and associated products storage in fixed tanks
Industrial Plaza (IP)	IP1 – EH Price Mechanical Sales, various industrial/commercial, 571 Chrislea Road IP2 – Various industrial/commercial, 641 Chrislea Road IP3 – Troy Chemical Company, 242 Applewood Crescent IP4 – Krome Transport, various industrial/commercial, 644 Millway Avenue IP5 – Metal Fabrication, 625 Millway Avenue IP6 - Various industrial/commercial, 2921 Langstaff Road	8 - Chemical Manufacturing, Processing and Bulk Storage  19 - Electronic and Computer Equipment Manufacturing  23 - Fire Retardant Manufacturing, Processing and Bulk Storage  29 - Glass Manufacturing  31 - Ink Manufacturing, Processing and Bulk Storage  32 - Iron and Steel Manufacturing and Processing

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY NUMBER (AS PER ONTARIO REGULATION 153/04) <sup>1</sup>
	<p>IP7 – Toro Glasswall, 2891 Langstaff Road</p> <p>IP8 – Thyssen Krupp, 2821 Langstaff Road</p> <p>IP9 – Toys R Us Warehouse, 2777 Creditstone Road</p> <p>IP10 – Various industrial/commercial, 8470 Keele Street</p> <p>IP11 – Korean Food Trading, 8500 Keele Street</p> <p>IP12 – Oldcastle, 2195 Langstaff Road</p> <p>IP13 – Regional Hose and Hydraulics, various industrial/commercial, 15 Connie Crescent</p> <p>IP14 - Various industrial/commercial, 45 Connie Crescent</p> <p>IP15 – Langstaff Business Park, various industrial/commercial, 124 Connie Crescent</p> <p>IP16 – Langstaff Business Park, various</p>	<p>33 - Metal treatment, coating, plating and finishing</p> <p>34 - Metal Fabrication</p> <p>39 - Paints Manufacturing, processing and bulk storage</p> <p>43 - Plastics (including Fibreglass) manufacturing and processing</p> <p>51 - Solvent Manufacturing, processing and bulk storage</p> <p>54 - Textile manufacturing and processing</p> <p>57 - Vehicles and Associated Parts Manufacturing</p> <p>Other – various wastes</p>

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY NUMBER (AS PER ONTARIO REGULATION 153/04) <sup>1</sup>
	<p>industrial/commercial, 150 Connie Crescent</p> <p>IP17 – Langstaff Business Park, various industrial/commercial, 200 Connie Crescent</p> <p>IP18 – Hydraulic Repair, various industrial/commercial, 25 North Rivermede Road</p> <p>IP19 - various industrial/commercial, 140 Fernstaff Court</p> <p>IP20 – Valard, 21 Staffern Drive</p> <p>IP21 - various industrial/commercial, 37 Staffern Drive</p> <p>IP22 – Aeroplastics, various industrial/commercial, 91 Citation Drive</p> <p>IP23 – International Furniture Distribution, 31 Spinnaker Way</p> <p>IP24 – Signature Plastics, 41 Spinnaker Way</p>	

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY NUMBER (AS PER ONTARIO REGULATION 153/04) <sup>1</sup>
	<p>IP25 - various industrial/commercial, 51 Citation Drive</p> <p>IP26 – Magna Tool and Dye, 2000 Langstaff Road</p> <p>IP27 – Autopaints, various industrial/commercial, 25 Planchet Road</p> <p>IP28 – Mako Plastics, 45 Basaltic Road</p> <p>IP29 – Rex Power Magnetics, 65 Basaltic Road</p> <p>IP30 – Caledonia Plastics, 85 Basaltic Road</p> <p>IP31 – Ronco, 70 Planchet Road</p> <p>IP32 – Signs and Print, various industrial/commercial, 10 Basaltic Road</p> <p>IP33 – Stone Design, 8550 Keele Street</p> <p>IP34 – Keele St Business Centre, various</p>	

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY NUMBER (AS PER ONTARIO REGULATION 153/04) <sup>1</sup>

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY NUMBER (AS PER ONTARIO REGULATION 153/04) <sup>1</sup>
	<p>IP44 – Magna, 227 Courtland Avenue</p> <p>IP45 – Canadian Tire Warehouse, 336 Courtland Avenue</p> <p>IP46 – Concord Confections Inc., 345 Courtland Avenue</p> <p>IP47 – 4R HVAC Inc., 50 Four Valley Drive</p> <p>IP48 – Haidlmair, 51 Four Valley Drive</p> <p>IP49 – Sciex, 71 Four Valley Drive</p> <p>IP50 – Guide Valve Limited, 51 Terecar Drive</p> <p>IP51 – McNeil Electric, 180 Creditview Road</p> <p>IP52 – Doorland 2000 Inc., 221 Creditview Road</p> <p>IP53 – Climetec, 644 Edgeley Boulevard</p>	
Historic Gas Station (HGS)	HGS1 – 8400 Jane Street	28 – Gasoline and associated products storage in fixed tanks

LAND USE	LOCATIONS OF HIGH APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY NUMBER (AS PER ONTARIO REGULATION 153/04) <sup>1</sup>
Historic Cemetery (HC)	HC1 – 2077 Langstaff Road	Other – various organic wastes, formaldehyde and metals
Construction Site (CS)	CS1 – NE corner of 2001 Langstaff Road	30 - Importation of Fill Material of Unknown Quality

Notes: 1. The PCA ID numbers are from Ontario Regulation 153/04, Table 2 Site Condition Standards.

Recommendations:

- **Property Acquisitions Environmental Due Diligence:** For the purposes of undertaking the Langstaff Road improvements, if property acquisitions are required within APECs with high potential for contamination, it is recommended that property specific Phase One ESAs (and if necessary Phase Two ESAs) be completed in such areas in support of the property acquisitions.
- **Road Construction and Management of Surplus/Excess Soil:** With respect to road construction activities and management of surplus/excess soil, WSP recommends that a soil contaminant investigation, where excavation is proposed, be carried out by a qualified environmental consultant to assess soil quality in support of surplus/excess soil management in areas within or in close proximity to APECs with high potential for contamination. This recommendation should be reviewed and refined during Detail Design.

---

## 6.2 APECS WITH MODERATE POTENTIAL FOR CONTAMINATION

The APECs with moderate potential for contamination are shown in **Table 4** below and are illustrated on **Figures 2 to 4** (highlighted in yellow). The areas represent land uses that are commercial/light industrial properties, suspected of using chemical compounds or performing activities that may impact soil and/or groundwater within the Study Area, according to Ontario Regulation 153/04, as amended.

**Table 4 - APECs with Moderate Potential for Contamination in Study Area**

LAND USE	LOCATIONS OF MODERATE APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY (AS PER ONTARIO REGULATION 153/04) <sup>1</sup>
Commercial Plaza (CP)	CP1 – 8555 Jane Street CP2 – 9520 Jane Street CP3 – Miele Appliances, 161 Four Valley Drive CP4 – Royal 400 Center, 3550 Langstaff Road CP5 – 665 Millway Avenue CP6 – Futurecom, 3277 Langstaff Road CP7 – Selba Bath, 3231 Langstaff Road CP8 – 8461 Keele Street CP9 – 1681 Langstaff Road CP10 – 91 Fernstaff Court CP11 – 8555 Jane Street CP12 – 9520 Jane Street CP13 – 8395 Jane Street	Other – Various wastes
Garden Center (GC)	GC1 – Garden Center, 8955 West Road	Pesticides (including Herbicides, Fungicides, and Anti-Fouling Agents) manufacturing, processing, bulk storage and large-scale application
Major Traffic Hwy (HWY)	HWY1 – Highway 400, crossing Langstaff Road on the east side of Weston Road, Vaughan, ON.	Other – asphalt and road debris, salt applications, exhaust fumes and leaks, fuel spills, etc.

LAND USE	LOCATIONS OF MODERATE APECS IN STUDY AREA	POTENTIAL CONTAMINATING ACTIVITY (AS PER ONTARIO REGULATION 153/04) <sup>1</sup>
	HWY2 – Highway 407, crossing the Study Area in the far east portion.	

Notes: 1. The PCA ID numbers are from Ontario Regulation 153/04, Table 2 Site Condition Standards.

Recommendations:

- **Property Acquisitions Environmental Due Diligence:** For the purposes of undertaking the Langstaff Road improvements, if property acquisitions are required within APECs with moderate potential for contamination, it is recommended that property specific Phase One ESAs (and if necessary Phase Two ESAs) be completed in such areas in support of the property acquisitions.
- **Road Construction and Management of Surplus/Excess Soil:** With respect to road construction activities and management of surplus/excess soil, WSP recommends that a soil contaminant investigation, where excavation is proposed, be carried out by a qualified environmental consultant to assess soil quality in support of surplus/excess soil management in areas within or in close proximity to APECs with moderate potential for contamination. This recommendation should be reviewed and refined during Detail Design.

### 6.3 APECS WITH LOW POTENTIAL FOR CONTAMINATION

All other areas not highlighted on **Figures 2 to 4** indicate land use features considered to have a low potential for site contamination. The areas are generally classified as natural areas, open space or residential land use, which are not suspected of using chemical compounds harmful to the environment or human health.

Recommendations:

No additional environmental investigations are recommended for APECs with a low potential for contamination.

---

## 6.4 O.REG.406/19 IMPLICATIONS

Note to the reader: In 2021, WSP was asked to provide a recommendation with regards to how the newly introduced Ontario Regulation (O.Reg.) 406/19: On-Site and Excess Soil Management may impact this project. Because this is an infrastructure project, it may be exempt from certain requirements of O.Reg.406/19, however the following should be noted:

- The background documents ordered as part of this COS report may need to be updated to determine if there are land use changes to the Site and surrounding Study Area that could impact the quality of the excess encountered during construction.
- As well, prior to the removal of soil from the Project Area, some form of site/soil characterization will be required to facilitate the off-site management as described in the Soil Rules under O.Reg.406/19. As such, the soil contaminant investigation recommendation in the areas of high and moderate APECs still applies.

## 7 ASSESSOR QUALIFICATIONS

---

### 7.1 WSP CANADA INC.

WSP Canada Inc. (WSP) is a leading, full-service engineering company that has seen successful growth in the past decade with a Canadian contingent of approximately 8,000 people making a significant contribution to our 34,000 global staff, based in more than 500 offices, across 40 countries. In 2015, WSP acquired SPL Consultants Limited and MMM Group Limited, which has resulted in the expansion of our environmental services in Ontario. WSP, including SPL and MMM (both wholly owned subsidiaries of WSP), employs about 450 environment staff in Ontario including Professional Engineers, Professional Geoscientists, Biologists and Certified Technicians.

The firm provides services to transform the built environment and restore the natural environment, and its expertise ranges from environmental remediation to urban planning, from engineering iconic buildings to designing sustainable transport networks, and from developing the energy sources of the future to enabling new ways of extracting essential resources. Our focus is technical excellence and client service.

---

### 7.2 QUALIFIED PERSON

**Mr. Derek Stewart, M.Sc., P.Geo.**, a Contaminant Specialist/Senior Project Manager with WSP has more than 30 years' experience as a Contaminant Specialist/Senior Project Manager managing soil and groundwater investigations in support of transportation infrastructure and land redevelopment projects. Mr. Stewart's work includes project technical support for both regional planning and local scale impact assessment studies supporting transportation route planning for municipal, provincial and federal EAs; transportation infrastructure preliminary and detail designs; land redevelopment; and property acquisitions/dispositions. In addition, Mr. Stewart provides soil and groundwater management support for road, rail and transit infrastructure construction projects. In particular, Mr. Stewart has extensive experience providing excess soil management expertise and support for transportation and land development design and construction projects including contract and tender support, and implementation and monitoring of excess soil management during construction.

---

### 7.3 TECHNICAL SUPPORT

**Sarah Murray, B.Sc., P.Geo.**, works in the WSP Hamilton office in the Environmental Management Department successfully fulfilling the role of project manager, field/project coordinator and mentor to junior field staff. Sarah has experience completing numerous

Phase I and II Environmental Site Assessments, Designated Substance and Hazardous Material Surveys, water well surveys, hydrogeological investigations, contaminant remediation projects involving bulk material disposals, groundwater treatment and in-situ injections, as well as excess contaminated soil management during construction projects. Sarah is a Qualified Person for Environmental Site Assessments as per O.Reg.153/04. Sarah is a Certified Engineering Technologist (C.E.T.) with The Ontario Association of Certified Engineering Technicians and Technologists.

**Shannon Veenendaal, M.Sc., P.Geo.**, Shannon is an Environmental Scientist with WSP's Environmental Management Department with over 5 years of experience with coordinating and conducting soil and groundwater investigations, Preliminary Site Screenings, Contamination Overview Studies, and Excess Soil Management Plans in support of transportation infrastructure projects and property acquisitions. Shannon is also a Qualified Person (QPESA) as defined under Ontario Regulation 153/04, as amended.

## 8 STANDARD LIMITATIONS

WSP Canada Incorporated (WSP) prepared this report solely for the use of the intended recipient, Regional Municipality of York, in accordance with the professional services agreement. In the event a contract has not been executed, the parties agree that the WSP General Terms for Consultant shall govern their business relationship which was provided to you prior to the preparation of this report.

The report is intended to be used in its entirety. No excerpts may be taken to be representative of the findings in the assessment.

The conclusions presented in this report are based on work performed by trained, professional and technical staff, in accordance with their reasonable interpretation of current and accepted engineering and scientific practices at the time the work was performed.

The content and opinions contained in the present report are based on the observations and/or information available to WSP at the time of preparation, using investigation techniques and engineering analysis methods consistent with those ordinarily exercised by WSP and other engineering/scientific practitioners working under similar conditions, and subject to the same time, financial and physical constraints applicable to this project.

WSP disclaims any obligation to update this report if, after the date of this report, any conditions appear to differ significantly from those presented in this report; however, WSP reserves the right to amend or supplement this report based on additional information, documentation or evidence.

WSP makes no other representations whatsoever concerning the legal significance of its findings.

The intended recipient is solely responsible for the disclosure of any information contained in this report. If a third party makes use of, relies on, or makes decisions in accordance with this report, said third party is solely responsible for such use, reliance or decisions. WSP does not accept responsibility for damages, if any, suffered by any third party as a result of decisions made or actions taken by said third party based on this report.

In preparing this report, WSP has relied in good faith on information provided by others, as noted in the report. WSP has reasonably assumed that the information provided is correct and WSP is not responsible for the accuracy or completeness of such information.

Unless otherwise agreed in writing by WSP, the Report shall not be used to express or imply warranty as to the suitability of the site for a particular purpose. WSP disclaims any responsibility for consequential financial effects on transactions or property values, or requirements for follow-up actions /or costs.

Elevations used in this report are primarily to establish relative elevation differences between the specific testing and/or sampling locations and should not be used for other purposes, such as grading, excavating, construction, planning, development, etc.

Design recommendations given in this report are applicable only to the project and areas as described in the text and then only if constructed in accordance with the details stated in this report. The comments made in this report on potential construction issues and possible methods are intended only for the guidance of the designer. The number of testing and/or sampling locations may not be sufficient to determine all the factors that may affect construction methods and costs. We accept no responsibility for any decisions made or actions taken as a result of this report unless we are specifically advised of and participate in such action, in which case our responsibility will be as agreed to at that time.

Overall conditions can only be extrapolated to an undefined limited area around these testing and sampling locations. The conditions that WSP interprets to exist between testing and sampling points may differ from those that actually exist. The accuracy of any extrapolation and interpretation beyond the sampling locations will depend on natural conditions, the history of Site development and changes through construction and other activities. In addition, analysis has been carried out for the identified chemical and physical parameters only, and it should not be inferred that other chemical species or physical conditions are not present. WSP cannot warrant against undiscovered environmental liabilities or adverse impacts off-Site.

The original of this digital file will be kept by WSP for a period of not less than 10 years. As the digital file transmitted to the intended recipient is no longer under the control of WSP, its integrity cannot be assured. As such, WSP does not guarantee any modifications made to this digital file subsequent to its transmission to the intended recipient.

This limitations statement is considered an integral part of this report.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

<b>Project Description::</b>		This application is for approval to construct a new storm water management facility at the cargoflo jet fuel transload facility in the City of Vaughan. Specifically it is proposed to construct a new double weir with automatic sluice gates downstream of the new transload facility to provide storm water retention. The system will also act as an oil/water separator and will provide spill containment in the event of a catastrophic incident. The system will discharge to an outlet ditch which flows to the west leg of the Little Don River.

<b>Description:</b>		Bulk Plus Logistics Ltd. has been fined \$107,500, plus a victim fine surcharge, for violating the Environmental Protection Act. Bulk Plus Logistics Ltd. operates and manages a railway terminal located at 8820 Keele Street in Vaughan, Ontario. The Court heard in July 2006, an employee of the company was in the process of transferring hydrochloric acid from a railcar to a transport truck. Due to washers that were in poor condition and bolts that were the wrong size, acid was able to leak from the railcar, causing an acid plume to drift over a neighbouring business, a trucking company. The fumes from the spill resulted in an evacuation of the trucking company's building and property. Once the fumes dissipated from the area, a number of employees started to feel nauseous, experienced burning eyes and had difficulty breathing. A temporary triage center was set up in the parking lot of the trucking company to decontaminate affected employees. Some employees required hospital treatment. Bulk Plus Logistics Ltd. was charged following an investigation by the Ministry of the Environment's Investigations and Enforcement Branch. The company pleaded guilty to one count of violating section 14(1) of the Environmental Protection Act by causing or permitting a discharge of a contaminant which caused an adverse effect. The company was fined \$107,500, plus a victim fine surcharge, and given 90 days to pay. Justice of the Peace Karen Walker heard the case in the Ontario Court of Justice in Newmarket, Ontario, and imposed sentence on February 20, 2008.

**Description:**

Two Vaughn companies have been convicted for offences committed under the Environmental Protection Act and fined a total of \$115,000. The Canadian National Railway Company (CNR) was convicted for failing to comply with a ministry order and GT Reload Corp. for illegal waste activities. 'The Province is always prepared to go to court to defend the natural environment from those who would treat it irresponsibly and cause harm', said Environment Minister Jim Bradley. GT Reload Corp. was responsible for site operations at a solid non-hazardous waste transfer site in Vaughan owned by CNR.. Ministry staff conducted an inspection at the site and had concerns about the quantity of waste stored inside and outside the waste transfer building. A ministry order was issued to the CNR to reduce the quantity of waste stored in the building, remove all wood waste stored outside of the building in order to reduce the risk of a fire, and apply for a ministry approval for a sewage works. The company failed to fully comply with the ministry order. GT Reload Corp. was found guilty in an ex parte trial for exceeding the limits of waste tonnage stored in the building and in rail cars used to transport waste for disposal, storing waste outdoors, and for failing to maintain a log book. CNR pleaded guilty to failing to reduce the quantity of waste stored in the waste transfer building, failing to remove all wood waste stored outside the building, and failing to submit an application for a ministry approval for the discharge of sewage to a water course. The Canadian National Railway Company was fined \$35,000 and GT Reload Corp. was fined \$80,000 for a total of \$115,000 plus victim fine surcharges of \$28,750. The companies were given 30 days to pay the fines.

# Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

## **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

## **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2016**

## **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Nov 2016**

## **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

## **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-May 2017**

## **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2014**

## **Certificates of Approval:**

Provincial [CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Commercial Fuel Oil Tanks:**

Provincial [CFOT](#)

Since May 2002, Ontario developed a new act where it became mandatory for fuel oil tanks to be registered with Technical Standards & Safety Authority (TSSA). This data would include all commercial underground fuel oil tanks in Ontario with fields such as location, registration number, tank material, age of tank and tank size.

**Government Publication Date: Feb 28, 2017**

**Chemical Register:**

Private [CHEM](#)

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-May 2017**

**Compressed Natural Gas Stations:**

Private [CNG](#)

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 31, 2012**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial [COAL](#)

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial [CONV](#)

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Jul 2017**

**Certificates of Property Use:**

Provincial [CPU](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-Aug 2017**

**Drill Hole Database:**

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886-Aug 2015**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011-Jul 2017**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Aug 2017**

**Environmental Compliance Approval:**

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011-Jul 2017**

**Environmental Effects Monitoring:**

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Aug 2016**

**Environmental Issues Inventory System:**

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial [EMHE](#)

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**List of TSSA Expired Facilities:**

Provincial [EXP](#)

List of facilities with removed tanks which were once registered with the Fuels Safety Program of the Technical Standards and Safety Authority (TSSA). Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. Tanks which have been removed automatically fall under the expired facilities inventory held by TSSA.

**Government Publication Date: Feb 28, 2017**

**Federal Convictions:**

Federal [FCON](#)

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal [FCS](#)

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

**Government Publication Date: Jun 2000-Mar 2017**

**Fisheries & Oceans Fuel Tanks:**

Federal [FOFT](#)

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Apr 2015**

**Fuel Storage Tank:**

Provincial **FST**

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

**Government Publication Date: Feb 28, 2017**

**Fuel Storage Tank - Historic:**

Provincial **FSTH**

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial **GEN**

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Jun 2017**

**Greenhouse Gas Emissions from Large Facilities:**

Federal **GHG**

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date: 2013-Dec 2015**

**TSSA Historic Incidents:**

Provincial **HINC**

This database will cover all incidences recorded by TSSA with their older system, before they moved to their new management system. TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. The TSSA works to protect the public, the environment and property from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from pipelines, diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal **IAFT**

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**TSSA Incidents:**

Provincial **INC**

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

**Government Publication Date: Feb 28, 2017**

**Landfill Inventory Management Ontario:**

Provincial **LIMO**

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Dec 31, 2013**

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2017**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2014**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Aug 2010**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008 -Jun 2017**

**National Energy Board Wells:**

Federal

NEBW

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-2014**

**Oil and Gas Wells:**

Private

OGW

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-May 2017**

**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Oct 2016**

**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Aug 2017**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009**

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: 1988-Oct 2016**

**TSSA Pipeline Incidents:**

Provincial PINC

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. This database will include spills, strike and leaks from recorded by the TSSA.

**Government Publication Date: Feb 28, 2017**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994-Aug 2017**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-2016**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Aug 2017**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-May 2017**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date: 1988-Jun 2017**

**Wastewater Discharger Registration Database:**

Provincial **SRDS**

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-2014**

**Anderson's Storage Tanks:**

Private **TANK**

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal **TCFT**

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970-Jan 2015**

**TSSA Variances for Abandonment of Underground Storage Tanks:**

Provincial **VAR**

List of variances granted for abandoned tanks. Under the Technical Standards and Safety Authority (TSSA) Liquid Fuels Handling Code and Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

**Government Publication Date: Feb 28, 2017**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial **WDS**

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Jul 31, 2017**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial **WDSH**

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial **WWIS**

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Mar 31, 2017**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
