

How to Replace a Showerhead in 4 Easy Steps

You will need:

- Toothbrush
- Plumbing Tape
- WaterSense Labeled Showerhead
- wrench (optional)
- Cloth (optional)

1: Remove old showerhead.

2: Clean the thread.

3: Apply plumbing tape clockwise.

4: Twist on new waterSense labeled showerhead.

Replace your Showerhead

Want to save money on your water bill? Replacing your showerhead with a WaterSense labeled showerhead can save you 20% or more on your water use without sacrificing that satisfying spray. WaterSense labeled showerheads come in a range of designs and prices, so you can find the model that suits your style and fits your budget.

Save water by stopping leaks in your bathroom and all around your house.
